I travel alot, and XM radio helps me stay awake on long trips. Regular radio doesn't go everywhere I go. I have to constantly change stations. Being able to check the weather for areas where I'm going, before getting there is great. I have a sports car, and it doesn't manuver well in heavy rain. If I know in advance, I can prepare for the weather. Regular radio, you get the weather for the area you're in only. Please keep the travel and weather channels on XM.
